

The Safest Way to Travel over the Holidays

www.hossleyembry.com | (866) 522-9265

Over 100 million Americans will likely travel during the Christmas and New Year's holiday season, and the overwhelming majority - 91% - of long-distance travel (over 50 miles) takes place in personal vehicles, like cars, SUVs, and motorcycles.

But is that the safest way to travel? Below are some concrete facts and statistics about the safety of different travel options during the holiday season.

1 Motorcycles: The Most Dangerous Way to Travel

- Approximately 23,000 people killed in crashes between 2008 and 2013
- 217 deaths per billion miles traveled

2 Cars, Trucks, and SUVs: Risky

- Approximately 113,000 people killed in crashes between 2008 and 2013
- 5.75 deaths per billion miles traveled

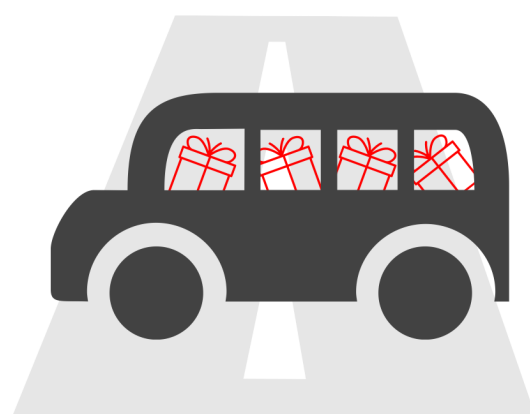

3 Trains: A Safe Way to Travel

- Approximately 125 people killed in crashes between 2008 and 2013
- 0.47 deaths per billion miles traveled

4 Buses: The Safest Way to Travel on the Road

- Approximately 150 people killed in crashes between 2008 and 2013
- 0.14 deaths per billion miles traveled

5 Planes: The Safest Way to Travel

- Approximately 55 people killed in crashes between 2008 and 2013
- 0.06 deaths per billion miles traveled
